CALABRIA REGION

What is the Calabria Region?

The Calabria Region is an Italian local Authority participating in the Project as associated partner.

Currently the Calabria Region is committed to develop the regional system of standards for the certification of competence.

What is its role in the Project?

The Calabria Region will sustain the project by promoting co-operation and synergies with competent institutions, qualification-awarding authorities and bodies involved at the technical, scientific and local level. Its co-operation will add value to the project by encouraging and increasing geographical mobility nationally and transnationally, matching qualifications systems to the needs of both citizens and the labour market, as well as by strengthening the European dimension of VET systems.
